

My favourite subject is English. Mr. Daniel and Ms. Choi are my teachers. I like to speak English.

P1 Damon

My favourite Subject is English. Ms. Choi and Mr. Daniel are my teachers. I like to play Teacher Says and Mr. Wolf.

P1 Samantha

My favourite subject is P.E. Ms. Lai is my teacher. I like to run.

P1 Cynthia

My favourite subject is English. Mr. Daniel and Ms. Choi are my English teachers. I like to play Mr. Wolf.

P1 Elisa

My favourite subject is Math. My Math teacher is Ms. Lai. I like to play math games in class.

P2 Jaden

My favourite subject is P.E. My teacher is Ms. Lai. I like to run really fast and play catch.

P2 Jasmine

My favourite subject is Putonghua. Ms. Yeung is my Putonghua teacher. I like to listen to stories.

P2 Lily

If I could have any class, I would like to have basketball class because I want to play basketball and earn money at it. I play basketball for one hour every day at home. I want to play for the Toronto Raptors when I grow up. I want to get paid one hundred thousand dollars/season.

P3 Sam

If I could have any classes, I would like to have chemistry, gymnastics, and swimming, because...

1. Sometimes, after chemistry class, I could be invisible so my sister couldn't find me when playing hide and seek.
2. If I knew gymnastics it would make my after school K-pop class easier.
3. I like swimming but I don't know how to swim, because I only go once a week.

P3 Kristy Chan

If I could have any class, I would like to have cooking and tea-making, because I could learn to cook for my family. I'd like to learn cooking for one hour each week. I like cooking

P3 Sophie

My dream subject is Japanese, because I think this language is really cool. I want to know how to speak and write Japanese, so I'd like to have three lessons per week. Then, I could speak Japanese when I go to Japan and communicate with people.

P4 Jason

My dream is to have a Nintendo Switch competition with my classmates at school every day. Why? Because all my classmates have a Switch and they're really good at playing Switch games. I think we could change our classroom to look like a battlefield. Classmates could improve their playing skills and share ideas about how to play better in a different games. We could use multiplayer to compete with each other, too. I think one hour would be enough for the morning session. Then, everybody would feel happy to be at school every day!

P4 Bosco

My dream subject is 'Become A Youtuber' class. I would make two funny videos a day. Sometimes I will check out some new games in my amazing videos. I would also make some games and cartoons with interesting characters. They would have beautiful clothes, smart faces, and weapons. But, to set this up, I'd need to learn a lot of computer knowledge so I'd need to pay more attention in class.

P4 Jerry

My dream subject is Science because I can learn to make interesting things. Yesterday, our teacher showed us a picture of a quantum computer. It was the biggest computer in the world! It can shrink 10,000 years of information into three minutes! We also learnt some new words about medicine, for example, 'germs', 'virus', and 'disease'. Science helps us improve our daily life in different ways. Phones, computers and i-pads help us talk with friends, and air-conditioners and fans help keep us cool in summer. I want to be a scientist in the future.

P4 Chloe

If I could have any subject, I would like a Chinese History class. It would need a big map to see where all the places are, and books for us to learn about people in the past. We could go to China on a field trip and ask the people there some questions. It will be boring for many people, but not for me. I like history very much!

P5 George

If I could have any subject, I would like to have a Racing Car Game Class. We would need a lot of phones, and access to all the cars in the game. I would practice a lot, win a lot of competitions, and become the most famous player in the world.

P5 Bowie

If I could have any subject, it would be nail polishing. I could learn how to put on different patterns on my nails. It would be beautiful! We would need the nail polish, LED lights and other tools. I would practice how to draw the patterns and put hearts and dots on my nails.

I think the girls would like this subject.

P5 Gloria

If I could choose any subject, I would like a clothing design class. We would need sewing machines, cloth, scissors, buttons, thread, cotton, tubes of glitter, needles, ribbons, silk, lace and wool. I really want to make clothes.

P5 Grace

My dream subject is Computer Programming Class. I love to write and I need to be creative! If our school had a computer programming class, I'd make an exciting game, or program some machines!

P6 Raymond

My dream subject is Cooking Class. I love cooking and creating delicious new dishes, like rose ice cream and green tea spaghetti. But, if our school had a cooking class, we would need to have a room just for cooking.

I hope my dream comes true!

P6 Charmaine

My dream subject is Nintendo Illustrator. I love drawing and playing games. If our school had a Nintendo drawing class, I would learn to draw Bowser. I wish this class was real.

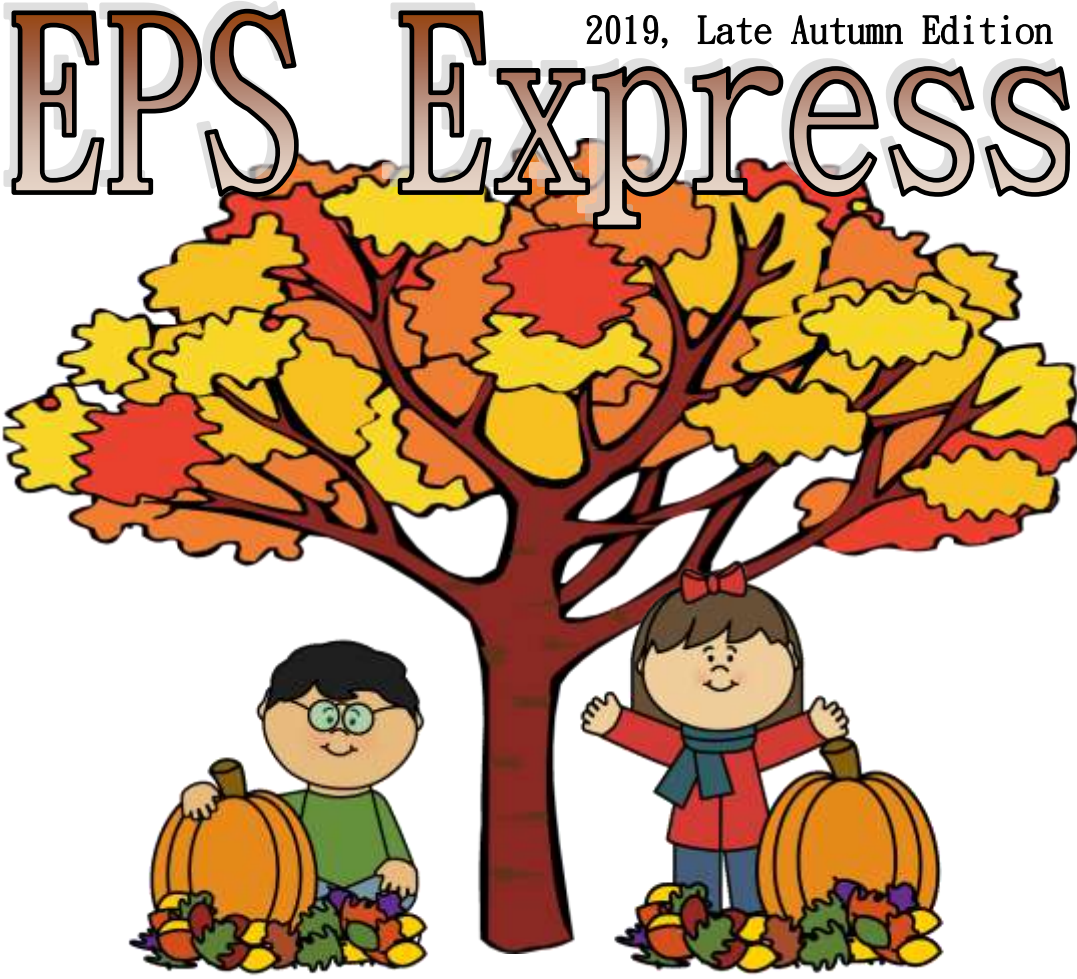

P6 Tom Koo

My dream subject is Home Economics. I'd love to learn to knit and fold clothes and if our school had Home Economics, I could learn things I need to do when I grow up. I wish the school had more room and money, so they could buy sewing machines and offer this class.

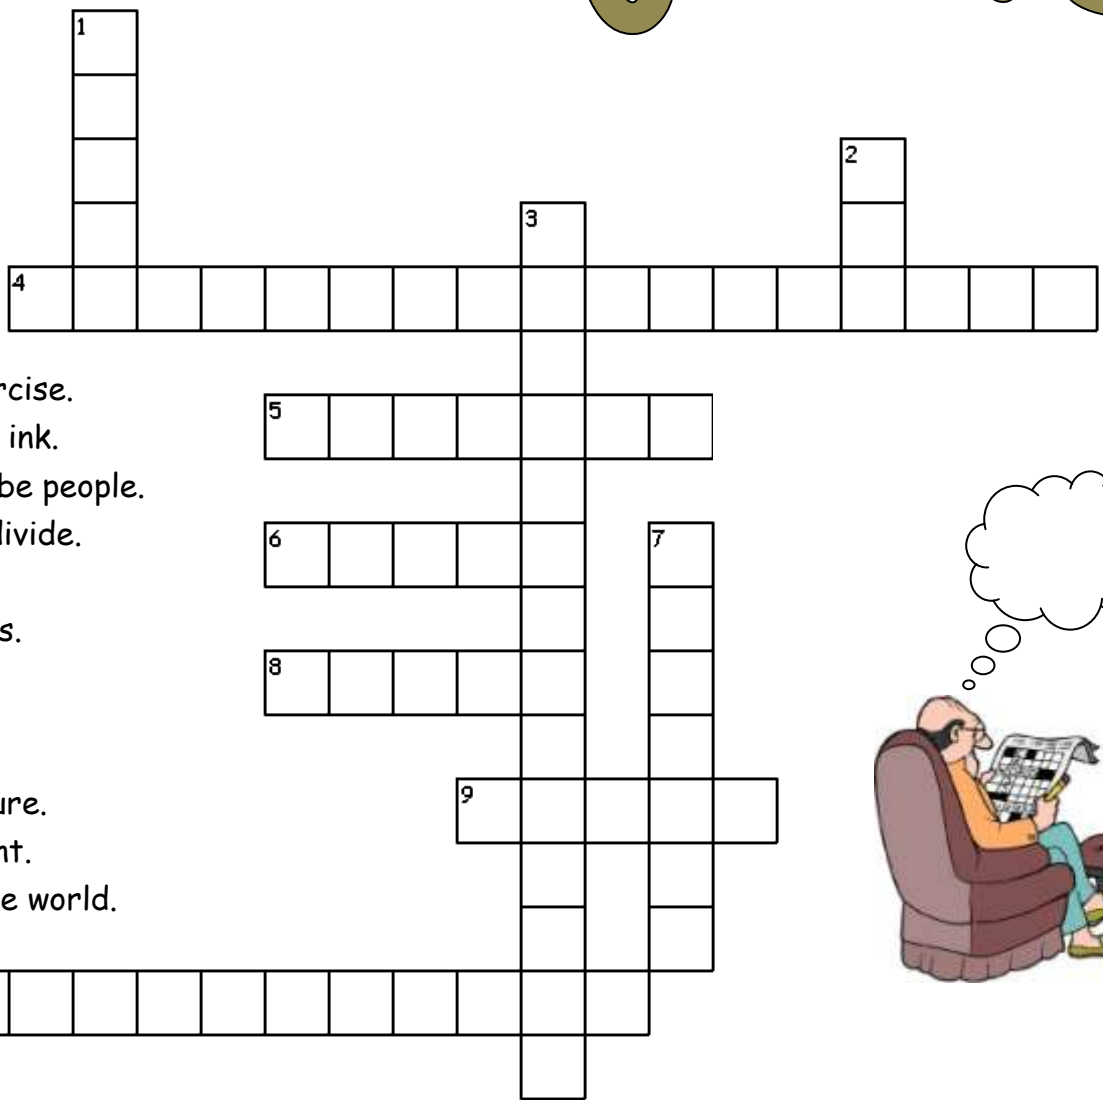

P6 Lydia

My dream subject is Acting Class. I LOVE acting, singing and dancing. If our school had this class, we could film things and put them on T.V. just like a real movie. There would be a huge room with film cameras, green screens, clothes and computers, and we would have rehearsal, before going out to film. Maybe we could even do some music videos. And after the recording, we would have a party!

P6 Ching Yiu

School Subjects

Across

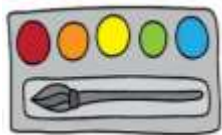

4. You can learn how to play sports and get exercise.
5. You can read old stories and write with black ink.
6. You can read the story aloud and pretend to be people.
8. You can learn to add, subtract, multiply and divide.
9. You can learn to sing or play an instrument.
10. You can read and think about the life of Jesus.

Down

1. This is not a subject. It's just when you eat.
2. You can learn about painters and paint a picture.
3. You can read a map or do a science experiment.
7. You can learn how to talk to people around the world.
